

Interactive Experience Project Plan

Project Details

Project Title	Your working title
Experience Type	Trying to steal from a king

Concept

You are trying to sneak into a casel to steal something. You have to find your way into the casel and get to the kings bed room to get something.

Progression

Introduction

You are apart of a crime sindicit and you have been given a mission to go steal somthing from the king. You have been sent a letter that debriefs you on your mission

Dear

You have been give the mission of stealing _____ frome the king. The idem is lockeated in the kings bed room. You only have a hour to get in and out of the casel before the gards will notice somthings is wrong.

Development

They have to decie what rooms to go into next and how to get into the

Conclusion

There will be 3 ending the. one that you are trying to get is the one where you have complested the mission you got out of the castle. The other two is where you the gards find out in one they just thought you out and the other you get put into the dunion.

Major Choices

Identify the major choices presented to the player/user and the situation in which they occur. Explain what happens with each decision. Do not spell out the exact dialog.

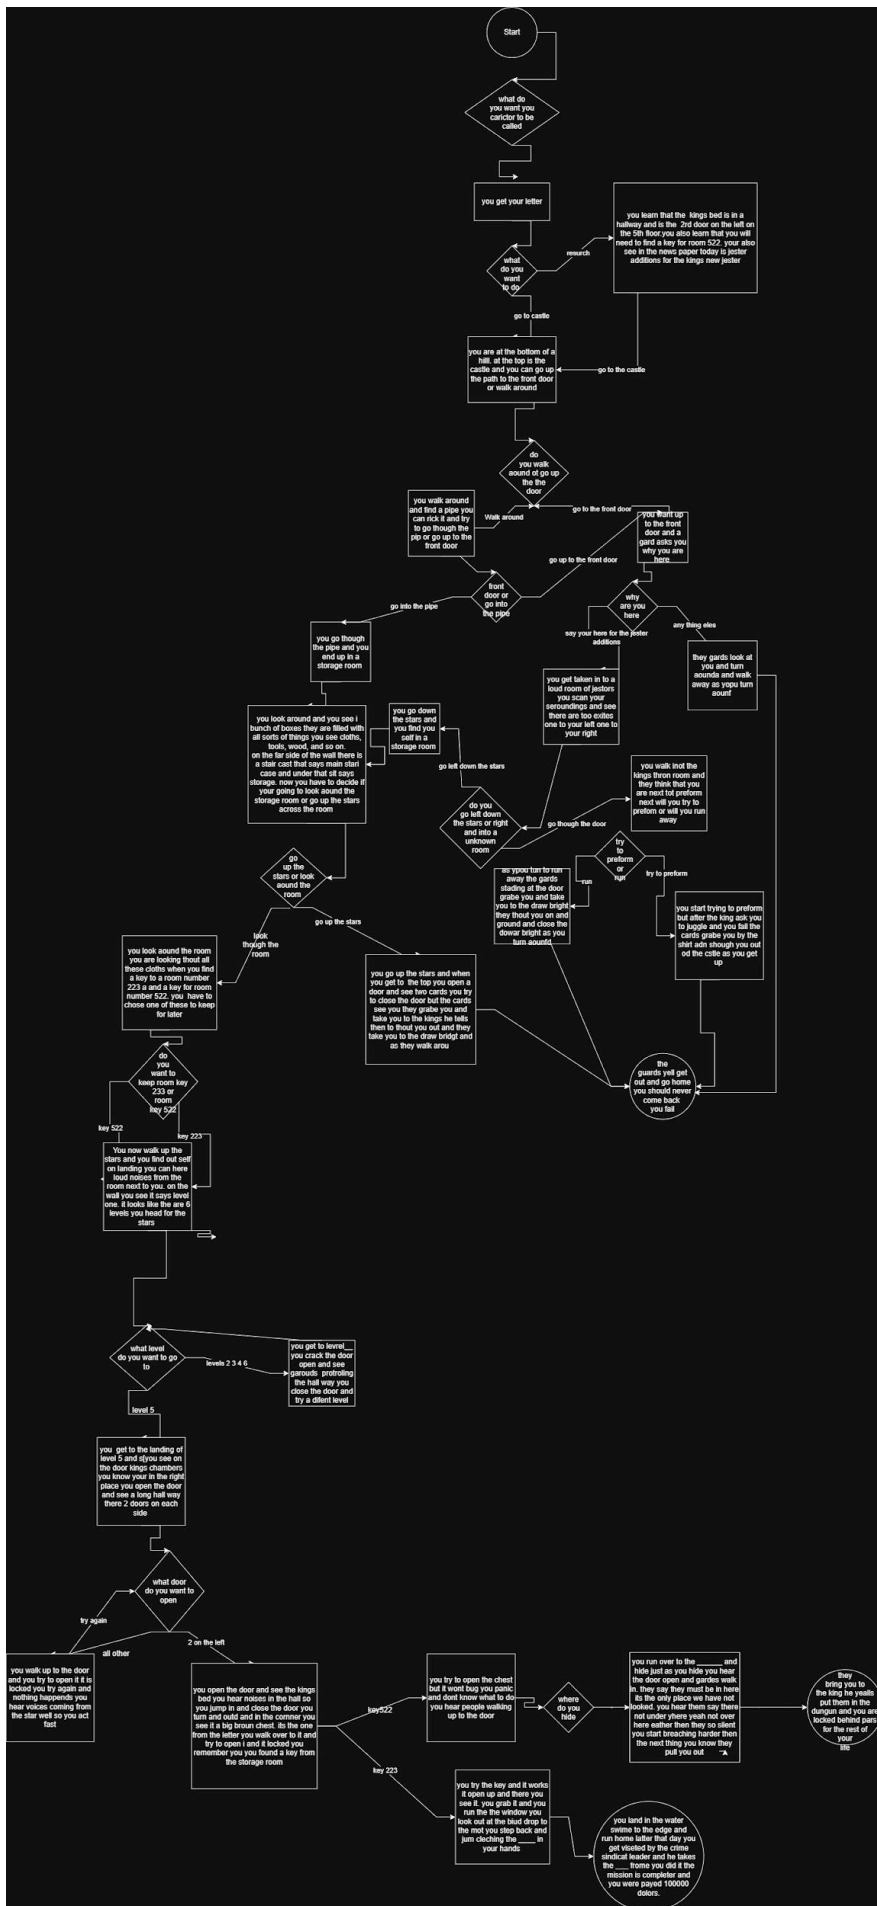

Situation	User Choices	What Happens Next
You are got the letter and you have to decide if your gonna research the castle or just go to it	If they resurcher they will get into on where the kings bedroom is and what rooms are next to it. If you research you ind out thet it is the 3th dorr on the right of a long hall way	They will research or go to the castle then they will go to the castle.
Then next big one is do you go to the front or the pipe	The pipe takes you to the storage room and yo can basicle skip everything that the going to the front door rout has to do.	They go tot the front and have to get in then find there way to the storage room. If you go into the pipe you just go strat to the storage room.
What floor you go to. If you did the reachurch earlier it will tell you that it is on the 5th floor so you have to know to go to the 5th floor.	They decidce what floor they want to go to	If they dont pick floor 5 it make them try again
They have to chose the right room to go into and when they do they see the box with the theing they are trying to get in it.	They have yto decide what room to go into to .	They go in and if they have the right key to the box they win in they doint they get caught.

Data to Track

Identify information/data that your program needs to keep track of. Examples include name, score, or other data.

Information	Example Value	Why the Program Needs It
Player name	Jude	To use it to say hi user name
What key they chose in the storage room	522 223	one is right and not and wont let ou finish

Flow

Minimum Viable Product (MVP)

Check the boxes to confirm that the experience plan would result in a Minimum Viable Product.

- ☐ Introduces the setting, player role, and goal clearly.
- ☐ Accepts and responds to user input.
- ☐ Tracks data or information.
- ☐ Changes what happens based on at least one earlier choice.
- ☐ Includes at least two possible endings.
- ☐ Provides clear instructions and valid choice options.
- ☐ Can be played from beginning to end without getting stuck.

Revisions
